The Many Faces of Global Migration report is an introduction to what Gallup has unearthed by asking migrants and potential migrants worldwide about their lives. The data presented in this report are based on Gallup's ongoing World Poll surveys in more than 150 countries, territories and regions and more than 750,000 interviews since 2005. As such, these findings provide an unprecedented look at the different push-and-pull factors that influence migration, the experiences of those who desire to migrate to other countries permanently or temporarily for work, those who are planning to go, those who are preparing to go, those who have already left, and those who have returned home – and what this means for governments, intergovernmental and non-governmental organizations, and other stakeholders.

Handbook of Toxicology of Chemical Warfare Agents, Third Edition, covers every aspect of deadly toxic chemicals used in conflicts, warfare and terrorism. Including findings from experimental as well as clinical studies, this essential reference offers in-depth coverage of individual toxicants,

Corporations have a huge influence on the life of every citizen—this book offers a visionary but practical plan to give every citizen a say in how corporations are run while also gaining some supplemental income. It lays out a clear approach that uses the mechanisms of the private market to hold corporations accountable to the public. This would happen through the creation of what the authors call the Universal Fund, a kind of national, democratic, mega mutual fund. Every American over eighteen would be entitled to a share and would participate in directing its share voting choices. Corporations and wealthy individuals would donate stocks, bonds, cash, or other assets to the fund just like they do to other philanthropic ventures now. The fund would pay out dividends to its citizen-shareholders that would grow as the fund grows. The Universal Fund is undoubtedly a big idea, but it is also eminently practical: it uses the tools of capitalism, not government, to give all citizens a direct influence on corporate actions. It would be a major institutional investor beholden not to

Download File PDF Trends International 2017 Mini Wall Calendar, September 2016 December 2017, 7 X 7, Sports Illustrated Swimsuit

a small elite group of stockholders pushing for short-term gain but to everyone. The fund would reward corporations that made sure their actions didn't harm people, communities, and the environment, and it would enable them to invest in innovations that would take more than a few months to pay off. Which is another reason corporations would donate to the fund—they could be freed from the constant pressure to maximize their quarterly share price and would essentially be subsidized for doing good. The authors demonstrate that our current economic rules force corporations to be shortsighted and even destructive because for most large investors, nothing matters but share price. The Universal Fund is designed to be a powerful positive balancing force, making the world a better place and the United States a better nation.

This book constitutes the thoroughly refereed post-workshop proceedings at PAKDD Workshops 2017, held in conjunction with PAKDD, the 21st Pacific-Asia Conference on Knowledge Discovery and Data Mining in May 2017 in Jeju, South Korea. The 17 revised papers presented were carefully reviewed and selected from 38 submissions. The workshops affiliated with PAKDD 2017 include: Workshop on Machine Learning for Sensory Data Analysis (MLSDA), Workshop on Biologically Inspired Data Mining

In the same format as *Adventure Time: A Totally Math Poster Collection*, this sturdy paperback houses 20 removable, frameable prints of the very best artwork from across the entire George Lucas-curated *Star Wars Art* series. Sixteen selections from *Visions, Comics, Illustration, Concept, and Posters*—including art by Jeffrey Brown, Philippe Druillet, Mike Mignola, Ralph McQuarrie, and Olly Moss—are joined by four newly commissioned artworks created specifically for this book by Max Dalton, Phantom City Creative, Tiny Kitten Teeth, and Jon Vermilyea. These high-quality, large-format, crease-free prints will be sure to transport *Star Wars* fans of all ages to a galaxy far, far away. . . .

This book provides a complete overview of a wide range of nanomaterials from their synthesis and characterization to current and potential applications with special focus on the use of such nano-based products as functional agents in biomedical, environmental and industrial applications. It addresses the intrinsic relationship between aspects involving the synthesis of nanocompounds, their bio-physico-chemical properties and

their interactions occurring in biomedical, environmental and industrial matrix. This book is of interest to engineers, academics and research scholars working in these fields. .

This book comprises the proceedings of the 12th National Technical Symposium on Unmanned System Technology 2020 (NUSYS'20) held on October 27–28, 2020. It covers a number of topics, including intelligent robotics, novel sensor technology, control algorithms, acoustics signal processing, imaging techniques, biomimetic robots, green energy sources, and underwater communication backbones and protocols, and it appeals to researchers developing marine technology solutions and policy-makers interested in technologies to facilitate the exploration of coastal and oceanic regions.

effective tool and valuable addition to a user's code products. In this updated code, the section on protection of piping has been completely rewritten, and readers are informed that line regulators installed in rigid piping must have a union installed to allow removal of the regulator. Almost 15 years ago, in *The World is Flat*, Thomas Friedman popularized the latest wave of globalization as a world of giant corporate supply chains that tripled world trade between 1990 and 2010. Major corporations such as Apple, Dell, and GE offshored manufacturing to low-cost economies; China became the world's factory, mass-producing and exporting computers and gadgets to Western shoppers. This paradigm of globalization has dominated global trade policy-making and guided hundreds of billions of dollars in business investments and development spending for almost three decades. But we are now on the cusp of a new era. *Revolutionizing World Trade* argues that technologies such as ecommerce, 3D printing, 5G, the Cloud, blockchain, and artificial intelligence are revolutionizing the economics of

trade and global production, empowering businesses of all sizes to make, move, and market products and services worldwide and with greater ease than ever before. The twin forces of digitization and trade are changing the patterns, players, politics, and possibilities of world trade, and can reinvigorate global productivity growth. However, new policy challenges and old regulatory frameworks are stifling the promise of this most dynamic, prosperous, and inclusive wave of globalization yet. This book uses new empirical evidence and policy experiences to examine the clash between emerging possibilities in world trade and outdated policies and institutions, offering several policy recommendations for navigating these obstacles to catalyze growth and development around the world.

Forecasting the future with advanced data models and visualizations. To envision and create the futures we want, society needs an appropriate understanding of the likely impact of alternative actions. Data models and visualizations offer a way to understand and intelligently manage complex, interlinked systems in science and technology, education, and policymaking. Atlas of Forecasts, from the creator of Atlas of Science and Atlas of Knowledge, shows how we can use data to predict, communicate, and ultimately attain desirable futures. Using advanced data visualizations to introduce different types of computational models, Atlas of Forecasts demonstrates how models can inform effective decision-making in education, science, technology, and policymaking. The models and maps presented aim to help anyone understand key processes and outcomes of complex systems dynamics, including which human skills are needed in an artificial intelligence-empowered economy; what progress in science and technology is likely to be made; and

how policymakers can future-proof regions or nations. This Atlas offers a driver's seat-perspective for a test-drive of the future.

In the early 21st century, five rising powers (Brazil, Russia, India, China, and South Africa) formed an exclusive international club, the BRICS. Although not extreme revisionists, the BRICS recognize an ongoing global power shift and contest the West's pretensions to permanent stewardship of the existing economic order. Together they exercise collective financial and monetary statecraft to achieve larger foreign policy goals. The BRICS share common resentments-of U.S. dominance of the global financial system, of playing junior roles in economic governance, and of serving as frequent targets of financial sanctions. They also share common objectives, such as obtaining greater financial autonomy and influence within the Bretton Woods

Download File PDF Trends International 2017 Mini Wall Calendar, September 2016 December 2017, 7 X 7, Sports Illustrated Swimsuit

institutions. Their financial statecraft ranges from pressure for the internal reform of international organizations and markets to operating outside the system through the creation of both new multilateral institutions and opportunity structures in international financial markets. To the surprise of many observers, the joint actions of the BRICS have been largely successful. The BRICS' future depends not only on their bargaining power and ability to successfully adjust to market shifts, but also on their ability to overcome domestic impediments to sustainable economic growth, which is the ultimate basis for their international influence.

This year's report presents evidence that the absolute number of people who suffer from hunger continues to slowly increase. The report also highlights that food insecurity is more than just hunger. For the first time, the report provides evidence that many people in the world, even if not hungry, experience moderate food insecurity as they face uncertainties about their ability to obtain food and are forced to compromise on the quality and/or quantity of the food they consume. This phenomenon is observed globally, not only in low- and middle-income countries but also in high income countries. The report also shows that the world is not on track to meet global nutrition targets, including those on low birthweight and on reducing stunting among children under five years. Moreover, overweight and obesity continue to increase in all regions, particularly among school-age children and adults. The report stresses that no region is exempt from the epidemic of overweight and obesity, underscoring the necessity of multifaceted, multisectoral approaches to halt and reverse these worrying trends. In light of the fragile state of the world economy, the report presents new evidence confirming that hunger has been on the rise for many countries where the economy has slowed down or contracted. Unpacking the links between economic slowdowns and downturns and food insecurity and malnutrition, the report contends that the effects of

the former on the latter can only be offset by addressing the root causes of hunger and malnutrition: poverty, inequality and marginalization.

While corporate governance has been a successful concept throughout the centuries, it is in question whether this concept can remain sustainable in the digital era and during a time of technological and managerial disruption. Under the pressure of new economic, social, and ecologic challenges, it is vital to understand how this concept needs to transform. *Challenges and Opportunities of Corporate Governance Transformation in the Digital Era* is an essential reference source that discusses concepts, trends, and forecasts of corporate governance and examines its transformation under the pressure of new technologies and economic changes. Featuring research on topics such as corporate identity, e-commerce, and cost management, this book is ideally designed for corporate leaders, managers, executives, business professionals, consultants, professors, researchers, and students. Now in its 40th year, *Emerging Trends in Real Estate* is one of the most highly regarded and widely read forecast reports in the real estate industry. This updated edition provides an outlook on real estate investment and development trends, real estate finance and capital markets, trends by property sector and metropolitan area, and other real estate issues around the globe. Comprehensive and invaluable, the book is based on interviews with leading industry experts and also covers what's happening in multifamily, retail, office, industrial, and hotel development.

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their

views to their older peers. Because where iGen goes, so goes our nation—and the world.

Design and Culture: A Transdisciplinary History offers an inclusive overview that crosses disciplinary boundaries and helps define the next phase of global design practice. This book examines the interaction of design with advances in technology, developments in science, and changing cultural attitudes. It looks to the past to prepare for the future and is the first book to offer an innovative transdisciplinary design history that integrates multidisciplinary sources of knowledge into a mindful whole. It shows design as a process that expresses goals through values and beliefs, functioning as a major factor in contemporary cultural life. Starting with the development of the Industrial Revolution, the book focuses on the evolution of design and culture in the twentieth century to predict where design will go in the future. Given the major social and political shifts currently unfolding across the globe, and the resulting changing demographics and environmental degradation, *Design and Culture* encourages collaboration and communication between disciplines to prepare for the future of design in a rapidly changing world.

This book illustrates the significance of nanotechnology in the delivery of anticancer and antimicrobial drugs, biomimetic technologies, tissue engineering, sensing, diagnostics, and artificial enzymes. It first briefly discusses the use of nanotechnology for the delivery

Download File PDF Trends International 2017 Mini Wall Calendar, September 2016 December 2017, 7 X 7, Sports Illustrated Swimsuit

of anticancer medications, and the concept and applications of catalytically active nanomaterial-based artificial enzymes for sensing and diagnostic applications. It then explores the use of silver nanoparticle-based novel antimicrobials, and comprehensively reviews the role of nanomaterials in developing biomedical implants and tissue engineering applications. Lastly, it offers a detailed description of nanotherapeutics for combating human protozoan parasitic infections. Cutting across the disciplines, this book serves as a guide for researchers and scientists in biotechnology, medical science and material science.

This publication presents the levels and trends in mortality from 1970 to 2015 drawn from the World Population Prospects. It highlights variations among countries in a number of mortality indicators: annual deaths; crude death rates; life expectancy at birth by sex; infant mortality; under-five mortality; and probabilities of dying from age 15 to age 60 and from birth to age 70. Estimates of mortality are complemented by information on the age distribution of deaths.
