

Cat D353 Marine Engine

Peter Wilson has played a key role in the development of the worlds largest and most important tuna resource in the Western Pacific. After studying Japanese and Fisheries at the University of Washingtons College of Fisheries he became one of the initial users of SCUBA gear for commercial fishing. He was then hired by Bumble Bee Seafood Company to conduct fisheries surveys in Japan, Okinawa, Palau, Palmyra, French Frigate Shoals, Johnston Island, Midway and elsewhere. After establishing artificial reefs in Guam and using explosives to create improved ocean circulation in Tumon Bay for tourism development, he was retained by the Micronesian governments to head up fisheries development for Palau, FSM and the Marshall Islands. During this period he established the first commercial tuna fishing operation in the Western Pacific after WWII and dive industries in Palau and Truk (Chuuk). He then went to Oman to prepare a Five Year Fisheries Development Program and was then retained by FAO to serve as the Director of Fisheries and Advisor to Government of Papua New Guinea for seven years to head up their fisheries operations, He then created Global Ocean Consultants and was then selected by the Republic of Maldives to establish a World Bank financed tuna industry on a small atoll with no harbor, housing, power or water. GOC provided management and training services for five years and during this period established a profitable cannery, can manufacturing plant, fishmeal plant and brought production up to over 60 tons a day.
