

James Borg Mind Power

In Speaking Christian, acclaimed Bible scholar Marcus Borg, author of Meeting Jesus Again for the First Time, argues that the very language Christians use has become dangerously distilled, distorted, and disconnected from the beliefs which once underpinned it. Stating a case that will resonate with readers of N. T. Wright’s Simply Christian, Borg calls for a radical change to the language we use to invoke our beliefs—the only remedy that will allow the Church’s words to once again ring with truth, power, and hope.

Your mind really can propel you to success or hold you back. Whether you want to remember more or worry less, control your anger or free your ambition, there is a way to change your life for the better by changing the way you think. In MIND POWER, James Borg will show you how to change the way you think, and act, forever.

This book provides eloquent support for the idea that spontaneous neuron activity, far from being mere noise, is actually the source of our cognitive abilities. In a sequence of "cycles," Györy Buzsáki guides the reader from the physics of oscillations through neuronal assembly organization to complex cognitive processing and memory storage. His clear, fluid writing-accessible to any reader with some scientific knowledge-is supplemented by extensive footnotes and references that make it just as gratifying and instructive a read for the specialist. The coherent view of a single author who has been at the forefront of research in this exciting field, this volume is essential reading for anyone interested in our rapidly evolving understanding of the brain.

We all want people to do stuff. Whether you want your customers to buy from you, vendors to give you a good deal, your employees to take more initiative, or your spouse to make dinner—a large amount of everyday is about getting the people around you to do stuff. Instead of using your usual tactics that sometimes work and sometimes don't, what if you could harness the power of psychology and brain science to motivate people to do the stuff you want them to do - even getting people to want to do the stuff you want them to do. In this book you'll learn the 7 drives that motivate people: The Desire For Mastery, The Need To Belong, The Power of Stories, Carrots and Sticks, Instincts, Habits, and Tricks Of The Mind. For each of the 7 drives behavioral psychologist Dr. Susan Weinschenk describes the research behind each drive, and then offers specific strategies to use. Here's just a few things you will learn: The more choices people have the more regret they feel about the choice they pick. If you want people to feel less regret then offer them fewer choices. If you are going to use a reward, give the reward continuously at first, and then switch to giving a reward only sometimes. If you want people to act independently, then make a reference to money, BUT if you want people to work with others or help others, then make sure you DON'T refer to money. If you are going to increase the motivation of your team, presenting or motivating things in the middle are more easily forgotten. If you are using feedback to increase the desire for mastery keep the feedback objective, and don't include praise. Celebrate the 40th anniversary of Star Trek: The Motion Picture with this classic movie novelization written by Legendary Star Trek creator Gene Roddenberry! The original five-year mission of the Starship Enterprise to explore strange new worlds and to seek out new life and new civilizations has ended. Now James T. Kirk, Spock, Dr. McCoy, and the rest of the crew of the Enterprise have separated to follow their own career paths and different lives. But now, an overwhelming alien threat—one that is ignoring all attempts at communication and annihilating all opposition in its path—is on a collision course with Earth, the very heart of the United Federation of Planets. And the only vessel that Starfleet can send in time to intercept this menace is a refitted Enterprise, with her old crew heeding the call to once again boldly go where no one has gone before...

From the author of the National Book Award finalist Black Leopard, Red Wolf and the WINNER of the 2015 Man Booker Prize for A Brief History of Seven Killings "An undeniable success. " — The New York Times Book Review A true triumph of voice and storytelling, The Book of Night Women rings with both profound authenticity and a distinctly contemporary energy. It is the story of Lilith, born into slavery on a Jamaican sugar plantation at the end of the eighteenth century. Even at her birth, the slave women around her recognize a dark power that they – and she will come to both revere and fear. The Night Women, as they call themselves, have long been plotting a slave revolt, and as Lilith comes of age they see her as the key to their plans. But when she begins to understand her own feelings, desires, and identity, Lilith starts to push at the edges of what is imaginable for the life of a slave woman, and risks becoming the conspiracy's weak link. But the real revelation of the book-the secret to the stirring imagery and insistent prose-is Marlon James himself, a young writer at once breathtakingly daring and wholly in command of his craft.

The tennis star offers a candid account of his athletic career that reveals his rise to fame on the court, his most dramatic on-court moments, his famed rivalry with Andre Agassi, and the pressures of and lessons learned about success.

Read People Like a Book--7 ESSENTIAL SKILLS for getting exactly what you want The most important 90% of communication is nonverbal. It's silent--but not hidden. It's instinctual--but you can control it. This book shows you how. You'll learn how to: " Read the nonverbal signals that tell you exactly what people are thinking, feeling, and planning. " Control your own nonverbal communication so you deliver the right message and get the right results. * Decipher gestures and read minds. * Stop sending signals that undercut your words. * Communicate more successfully with friends, family, colleagues, customers, strangers...everyone! Are you trustworthy? Likable? Interesting? Are you the right person to hire? To buy from? People start judging you the instant they meet you--and they never stop. You do the same for them. Based on what? Not just words: 90% of the information people present about themselves is nonverbal. Body Language is about understanding that 90%--and making the most of it. It's about learning to consciously read the silent messages other people are sending...so you know what they're really feeling, thinking, and intending to do. It's about learning to control your own body language so that you communicate more powerfully and successfully with everyone in your life. Need an edge? Ever worry that you're not getting your message across? Then these are the most important communication skills you will ever learn. * Recognize lies, fears, and how people are responding to you Sharpen your intuitions and perceptions and use them to communicate more effectively * Overcome bad body language habits that convey the wrong message Turn the innocent mistakes that turn people off * Read people through "context, congruence, and clusters" Use body language together with everything else you know, hear, and see * Gain the charisma that comes with effective listening People want to be heard--learn how to give them what they want

Take control of your mind, change your thinking and create a future of success. Mind Power is literally packed with power; the power to take full control of your mind, your emotions and your life. Your mind and the way you think informs absolutely everything you feel, do and say. Imagine how effectively you could command and influence the direction of your life if you knew how to control the power of your mind. Learn to take control of fear and anxiety; improve all the relationships in your personal and business life; harness the full power of your memory, logic and analytical skills; be more persuasive, influential and impactful; and open your mind to a 'can-do' attitude. Anything is possible. You're held back only by the limits of your mind. At work and in your personal life, Mind Power will show you how to take control, change your attitudes and create a future of success. When you change your thinking - you change your life! One step at a time the bestselling author, James Borg, shows readers how to * "Develop an awareness of their thinking style and alter their mind-set. * Take control of fear and anxiety. *Manage your mind-induced stress and anger. *Harness the limitless powers of your memory. *Develop powerful 'inner' and 'outer' talk to change outcomes. *Open your mind to a positive 'make it happen' attitude. *Improve your relationships with other people in your personal and business life. James Borg is a practising work psychologist and business consultant. His quest for 'Mind Power' started at an early age as he tried out techniques for getting the brain to process complicated calculations - he was soon able to rite multiplication tables from 2 to 1000 and perform feats of mental arithmetic. James also became interested in magic at a young age and was admitted as one of the youngest-ever members of the Magic Circle.

You've heard of the Power of Positive Thinking. There's no doubt about it: the human mind is an amazingly powerful computer, capable of transforming our lives. But achieving what you want in life isn't accomplished by sitting in your comfy chair and visualizing all day long. Far too many people neglect to ACT on their own behalf in order to bring their dreams to life. As cosmetics company founder and CEO Este Lauder put it so well, "I didn't get here by dreaming about it or thinking about it - I got here by doing it." In The Power of Positive Doing, BJ Yaregier has captured the "secret" no one is talking about - you can actually change your thoughts and attitudes by taking positive ACTION, no matter what you're thinking or feeling! She calls it "The Power of Positive DOING" - the title of her latest book. B.J. is no stranger to Simple Truths' readers. The author of more than 20 books, including Friends, Oil for Your Lamp, and The Best Way Out is Through, her engaging stories and original poetry have put her on our best-seller list.

A pioneering neuroscientist argues that we are more than our brains To many, the brain is the seat of personal identity and autonomy. But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact. This blinds us to the physical realities of mental function. We ignore bold influences on our psychology, from chemicals in the blood to bacteria in the gut, and overlook the ways that the environment affects our behavior, via factors varying from subconscious sights and sounds to the weather. As a result, we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers. But a brain is neither a soul nor an electrical network: it is a bodily organ, and it cannot be separated from its surroundings. Our selves aren't just inside our heads--they're spread throughout our bodies and beyond. Only once we come to terms with this can we grasp the true nature of our humanity.

A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know exactly what causes what and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another, but also why. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs The Book of Why.

A new book from James Borg -- on what to say and how to say it -- so you can get more from the way you talk. All the day-to-day conversations that you have in your private and working life result in a particular outcome. How many times do you come away from a situation and think you could have handled it better? The realization that you should have used different words or said things in a different tone which might have produced a more positive result or avoided friction. How often have you felt frustrated at your inability to state your case and to exp your point? Make no mistake - talk is our most precious commodity. Human interaction and face to face communication came long before social media websites, e-mail and texting. Yet more and more people have lost the art of conversing effectively and successfully as the 'screen' replaces conversation. Talkability provides tried and tested suggestions to help you get your points across and make things happen.

This second edition of a seminal work includes the original text, first published 30 years ago, alongside two major new chapters. Power, Freedom and Reason assesses the main debates about how to conceptualize and study power, including the influential contributions of Michel Foucault. Power Revisited reconsiders Steven Lukes' own views in light of these debates and of criticisms of his original argument. With a new introduction and bibliographical essay, this book will consolidate its reputation as a classic work and a major reference point within social and political theory.

One of the vital challenges facing thoughtful people today is how to read the Bible faithfully without abandoning our sense of truth and history. Reading the Bible Again for the First Time provides a much-needed solution to the problem of how to have a fully authentic yet contemporary understanding of the scriptures. Many mistakenly believe there are no choices other than fundamentalism or simply rejecting the Bible as something that can bring meaning to our lives. Answering this modern dilemma, acclaimed author Marcus Borg reveals how it is possible to think and our deepest spiritual needs, leading to a contemporary yet grounded experience of the sacred texts. This seminal book shows you how to read the Bible as it should be examined—in an approach the author calls "historical-metaphorical." Borg explores what the Scriptures meant to the ancient communities that produced and lived by them. He then helps us to discover the meaning of these stories, providing the knowledge and perspective to make the wisdom of the Bible an essential part of our modern lives. The author argues that the conventional interpretation of the Bible to millions of people in our time, and that we need a fresh way of encountering the Bible that takes the texts seriously but not literally, even as it takes seriously who we have become. Borg traces his personal spiritual journey, describing for readers how he moved from an unquestioning childhood belief in the biblical stories to a more powerful and dynamic relationship with the Bible as a sacred text brimming with meaning and guidance. Using his own experience as an example, he reveals how the modern crisis of faith, historical record and divine dictation, and opens readers to a truer, more abundant perspective. This unique book invites everyone—whatever one's religious background—to engage the Bible, wrestle with its meaning, explore its mysteries, and understand its relevance. Borg shows us how to encounter the Bible in a fresh way that rejects the limits of simple literalism and opens up rich possibilities for our lives.

Organizational change can be unpredictable and stressful. With a better understanding of what our brains need to focus and perform at their best, organizations and leaders can increase employee engagement, productivity and well-being to successfully manage such periods of uncertainty. Drawing on the latest scientific research and verified by an independent neuroscientist, Neuroscience for Organizational Change explores the need for social connection at work, how best to manage emotions and reduce bias in decision-making, and why we need communicational change. Practical tips and suggestions can be found throughout, as well as examples of how these insights have been applied at organizations such as Lloyds Banking Group and GCHQ. The book also sets out a practical science-based planning model, SPACES, to enhance engagement. This updated second edition of Neuroscience for Organizational Change contains new chapters on planning the working day with the brain in mind and on overcoming the difficulties related to behavioural change. It also features up-to-the-minute video content reflecting the latest studies from the first edition which give a long-term view of the benefits of applying neuroscience in organizations.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion and our politics. Academic title of Julian Jaynes's "The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, The New Yorker "He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is more convincing than Freud."—American Journal of Psychiatry

Creativity for Innovation Management is a rigorous yet applied guide which illustrates what creativity is, why it matters, and how it can be developed at both individual and group levels. Unlike many technique-oriented books, this book will combine theory and practice, drawing on the latest research in psychology, organizational behaviour, innovation and entrepreneurship. This exciting new text outlines the necessary skills and competences for innovative and creative processes. It provides opportunities to explore these and also to develop them via a wide variety of activities linked to relevant tools and techniques, as well as a range of case studies. By working through key competence areas at personal and then team levels, students then have an opportunity to practice and enhance these skills. This will be complemented by online resources which will provide students with access to key tools and techniques plus activities to help develop their creativity. This textbook is ideal for students of innovation, management and entrepreneurship, as well as professionals in those industries that want to excel by developing and applying their own creativity at work.

Twelve-year-old Ryan Edwards wants desperately to win his club's go-kart championship, and work his way up to win the Indianapolis 500 someday so he can earn his own "Baby Borg" Trophy - but apparently, someone has other ideas for him! Who is deliberately messing with his go-kart? Also why? and how? -- when it's carefully locked up every time? Ryan feels that it's nasty, mean Kyle Sampson, who is fastest on the track, and always puts Ryan down... With his father's great help, Ryan races hard, with exciting karting action, but each new mystery leads to another - the go-kart tampering, the mysterious go-kart champion Joe Yoshida -- and more. New questions lurk around each and every corner... Ryan's dog, Sparkplug, suspects trouble from the very beginning, and later discovers a vital clue. And what would Ryan do without his neighbor, Timmy, who wants to be a de-aktiv somesday, all the mysteries are finally solved. From the first chapter, Chasing The Checkered Flag - an intense blend of high-speed racing facts and fiction - will keep each reader reading, and guessing... until the very end.

AN INSTANT NEW YORK TIMES BESTSELLER! From the # 1 New York Times bestselling author of Eat Pray Love and The Signature of All Things, a delicious novel of glamour, sex, and adventure, about a young woman discovering that you don't have to be a good girl to be a good person. "A spellbinding novel about love, freedom, and finding your own happiness." - PopSugar "Intimate and richly sensual, razzle-dazzle with a hint of danger." -USA Today "Pairs well with a cocktail...or two." -TheSkimm "Life is both fleeting and dangerous, and there is no point in denying yourself pleasure, or being anything other than what you are." Beloved author Elizabeth Gilbert returns to fiction with a unique love story set in the New York City theater world during the 1940s. Told from the perspective of an older woman as she looks back on her youth with both pleasure and regret (but mostly pleasure), City of Girls explores themes of female sexuality and promiscuity, as well as the idiosyncrasies of true love. In 1940, nineteen-year-old Vivian Morris has just been kicked out of Vassar College, owing to her lackluster freshman-year performance. Her affluent parents send her to Manhattan to live with her Aunt Peg, who owns a flamboyant, crumbling midtown theater called the Lily Playhouse. There Vivian is introduced to an entire cosmos of unconventional and charismatic characters, from the fun-chasing showgirls to a sexy male actor, a grand-dame actress, a lady-killer writer, and no-nonsense stage manager. But when Vivian makes a personal mistake that results in professional scandal, it turns her new world upside down in ways that it will take her years to fully understand. Ultimately, though, it leads her to a new understanding of the kind of life she craves - and the kind of freedom it takes to pursue it. It will also lead to the love of her life, a man twice her age, who has a secret of his own.

A spiritual guidebook to living life through love and connection, not fear and isolation, by a respected pastor and a frequent guest on Oprah's Soul Series. Reverend Bacon believes that every person can live a full and creative life if they can learn to move through troubling emotions such as fear, anger, and sadness to find the beloved within themselves. Readers will learn how insecurity can keep us from connecting with others, our loving self, and finding our own peace, joy, and creative power. 8 Habits of Love will show, through relatable stories, how to create a full, meaningful life by developing simple habits--stiness, truth, forgiveness, compassion, joy, candor, generosity, and community--and by asking such important questions as: How do I know I'm living the life I should be? How do I forgive those who have hurt me? How do I talk candidly with difficult people? How do I best help others when they need it? And How do I go of the past and move forward?

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live this way." Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? How do you relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? A wonderful readmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a 'one size fits all mentality' and provides solutions as varied as the individuals used as examples. How to Read Others, Detect Deceit, and Convey the Right Message

A no-holds-barred, intimate memoir by John McEnroe—the bad boy of professional tennis. John McEnroe stunned the tennis elite when he came out of nowhere to make the Wimbledon semifinals at the age of eighteen—and just a few years later, he was ranked number one in the world. You Cannot Be Serious is McEnroe at his most personal, an intimate examination of Johnny Mac, the kid from Queens, and his “wild ride” through the world of professional tennis at a boom time when players were treated like rock stars. In this “bracing serve-and-volley autobiographical memoir,” (The Boston Globe) he candidly explores the roots of his famous on-court explosions; his ambivalence toward the sport that made him famous; his adventures (and misadventures) on the road; his views of colleagues from Connors to Lendl; his opinions of contemporary tennis; his marriages to actress Tatum O’Neal and pop star Patty Smyth; and his roles as husband, father, senior tour player, and often-controversial commentator.

Anything is possible. You're held back only by the limits of your mind. At work and in your personal life, Mind Power will show you how to take control, change your attitudes and create a future of success. When you change your thinking - you change your life! Philosophy and space travel are characterized by the same fundamental purpose: exploration. An essential guide for both philosophers and Trekkers, Star Trek and Philosophy combines a philosophical spirit of inquiry with the beloved television and film series to consider questions not only about the scientific prospects of interstellar travel but also the inward journey to examine the human condition. The expansive topics range from the possibilities for communication among different cultural backgrounds to questions about the stoic temperament exhibited by Vulcans to Ferengi business practices. Specifically chosen to break new ground in exploring the philosophical dimensions of Star Trek, these articles boldly go where no philosopher has gone before.
