

Medical Oncology Mcqs

I have written this book in three volumes. Notes on how to read a "kindle edition book" on your phone/tablet: 1. Download the "kindle app" on your phone/tablet. 2. Sign in with your Amazon account once you have installed the app (if you don't have an account then make one). Now your app is ready to use. 3. Now comes the most important step. Remember that you can't buy a "kindle edition book" directly from this app you have just installed. So, now you should open your web browser (google/safari/firefox) and go to "www.amazon.in". 4. Again sign in with your amazon account there. 5. Once you have signed in your account on the web browser, search Amazon for "Bhratri Bhushan" or "oncology MCQ books" or copy and paste the links provided below; you will see the three volumes there. 6. Purchase the book you want to. 7. Now this book will automatically appear in your app. 8. Open your app and read the book (I have written this description because I had a difficult time figuring it out myself. I hope you will find it helpful. The most crucial step is in the third one, so read it again. And I would like to repeat that you don't need a kindle device to read a kindle edition.)

When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. For this purpose, I have written a book in two volumes "Oncology MCQs for NEET-SS, board review and other entrance exams". The purpose of this book on cancer staging is to equip the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge about the latest cancer staging standards, provided in the eighth edition of the AJCC cancer staging textbook. I must admit that this book by no means can serve as a reference book of cancer staging, as it is not comprehensive enough. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the standard textbooks and online tools. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com

Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature.

Volume 1 available at: <https://www.amazon.in/dp/B08371FV41> (e-book) <https://www.amazon.in/dp/1651694524> (paperback)

MCQs on cancer staging for NEET-SS is available at: <https://www.amazon.in/dp/B0846RY856>

When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of an oncologist and by relying on the highest quality material, most importantly the Bible of oncology: DeVita, Hellman, and Rosenberg's Cancer Principles & Practice of Oncology 11th edition. The NCCN guidelines and high impact journals were also referenced as and when needed. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the quarterly updates of DeVita's oncology that are included with the purchase of the 11th edition and also the NCCN guidelines. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com

Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature.

This book covers the topics of nonmalignant platelet disorders in an interactive, self-assessment format. Topics like platelet biology, lab hematology pertinent to platelets, platelet function testing, acquired disorders of platelet function, immune thrombocytopenia, congenital disorders, iatrogenic thrombocytopenia, heparin induced thrombocytopenia, thrombopoietic growth factors and platelet transfusion therapy et cetera are covered in depth. Malignant platelet disorders and malignant disorders in which platelets are affected, are not covered in this book and the review of malignant hematology conditions can be found in the book, Oncology MCQs for NEET-SS, vol. 2 by the author (available at <https://www.amazon.in/dp/B083VXXZY8>)

'Radiation Oncology: MCQs for Exams' (ROME) will cover the essential aspects of radiation physics, radiobiology, and clinical radiation oncology designed to meet the needs of a large scale of examinees. Topics of this new book will be in the order of our previous "Basic Radiation Oncology" (Springer, 2010) with additional two new chapters (Pediatric tumors and Rare tumors- Benign Diseases) making a total of 15 chapters and instead of old style question and answer format, current MCQ examination pattern helpful for both oral exams and written exams is used in this comprehensive bedside recall book complementing the "Basic Radiation Oncology" 1st Edition.

Please note that all of the contents of this book (along with other topics of hematology) are included in the book: Oncology MCQs for NEET-SS, volume 4 (hematology, malignant and benign), available at: <https://www.amazon.com/dp/B0899DTDGQ>. So, if you have purchased the fourth volume already, there is no need to buy this book. On the other hand, if you want to read only about this topic, then you should buy it. Complete set of books for NEET-SS oncology (medical oncology, surgical oncology and clinical hematology):

Volume 1: <https://www.amazon.in/dp/B08371FV41> (general oncology, modalities of cancer treatment, head and neck cancer, lung cancer, gastrointestinal cancers)

Volume 2: <https://www.amazon.in/dp/B083VXXZY8> (genitourinary cancers, gynecologic oncology, breast cancer, endocrine tumors, sarcomas, skin cancers, neuro-oncology, pediatric oncology, supportive and palliative care)

Volume 3: <https://www.amazon.in/dp/B0846RY856> (staging)

Volume 4: <https://www.amazon.in/dp/B0899DTDGQ> (hematology, malignant and benign)

This book covers the topics of AML in an interactive, self-assessment format. Topics like epidemiology, molecular biology, diagnosis and management are covered in detail, along with miscellaneous topics pertinent to AML. Please visit the Facebook Page for updates: <https://www.facebook.com/neetssoncology>

Notes on how to read a "kindle edition book" on your phone/tablet: 1. Download the "kindle app" on your phone/tablet. 2. Sign in with your Amazon account once you have installed the app (if you don't have an account then make one). Now your app is ready to use. 3. Now comes the most important step. Remember that you can't buy a "kindle edition book" directly from this app you have just installed. So, now you should open your web browser

(google/safari/firefox) and go to "www.amazon.in".4. Again sign in with your amazon account there.5. Once you have signed in your account on the web browser, search Amazon for "Bhratri Bhushan" or "oncology MCQ books" or copy and paste the links provided above; you will see the books there.6. Purchase the book you want to.7. Now this book will automatically appear in your app.8. Open your app and read the book.(I have written this description because I had a difficult time figuring it out myself. I hope you will find it helpful. The most crucial step is the third one, so read it again. His works can be found at his AuthorCentral page: www.amazon.com/author/bhratribhushan

Print version of the book includes free access to the app (web, iOS, and Android), which offers interactive Q&A review plus the entire text of the print book! Please note the app is included with print purchase only. Oncology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering the topics that appear on the Medical Oncology Certification Exam. This second edition has been thoroughly revised to include new treatment regimens, clinical guidelines, and other updates impacting the field and reflected on the test. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the Medical Oncology Certification Exam. The coverage spans all hematologic malignancies and solid tumors, beginning with the epidemiology, and followed by the etiology and risk factors of the disease, staging, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. Later chapters review other major subspecialty areas found on the exam including cancer genetics and tumor biology, supportive and palliative care, bone marrow transplantation, and biostatistics. Each chapter includes key points summarized in digestible bullets for easy recall and self-assessment. And, now containing over 230 board style questions with answers and detailed rationales, Oncology Board Review, Second Edition is the go-to, quick review for any trainee preparing for initial certification and for oncologists preparing for recertification. New to this Edition: Includes over 230 board style questions and answers with rationales New chapter on Bone Marrow Transplantation Thoroughly updated and revised chapters with all new treatment recommendations and FDA approvals for solid tumors and hematologic malignancies included. This concise text examines cancer causation and biology as well as the biology underlying cancer treatment. Thoroughly updated and reorganized with five new chapters, the Fourth Edition emphasizes new development in molecular biology, hormone therapy, and the pharmacology of anti-cancer drugs. Features updated coverage of the basic science of radiotherapy and experimental radiation in addition to expansive coverage of new drugs developments.

This book covers the topics of nonmalignant white blood cell disorders in an interactive, self-assessment format. Topics like white blood cell biology, lab hematology pertinent to white blood cells, Langerhans cell histiocytosis, hemophagocytic lymphohistiocytosis, congenital disorders, iatrogenic neutropenia and leukopenia, CHIP, ICUS, CCUS, neutropenia and its management et cetera are covered in depth.Malignant white blood cell disorders are not covered in this book and the review of malignant hematology conditions can be found in the book, Oncology MCQs for NEET-SS, vol. 2 by the author (available at <https://www.amazon.in/dp/B083VXXZY8>)Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published over twenty books on the subject of oncology and his papers have been published in renowned journals of medical literature. Many of his books have been bestsellers. His works can be found at his authorcentral page: <https://www.amazon.com/-/e/B07RC35J>

Hematology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering all topics that appear on the Hematology Certification Exam. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the exam and highlights topic areas that are often found on the test. For hematology and oncology fellows as well as practicing clinicians needing a refresher before taking MOC, this handy study guide provides succinct overviews of all blood disorders, syndromes and diseases with practice questions on the go. Each disorder or disease-based chapter provides the same structure for ease of use beginning with the epidemiology, and followed by the etiology and risk factors, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. The authors provide the most accurate and up-to-date information, including well-established treatment regimens for a variety of blood disorders, including iron disorders, bone marrow failure syndromes, platelet and megakaryocytic disorders, hemostasis, thrombosis, and hematologic malignancies. Later chapters review other major subspecialty areas found on the exam including transfusion medicine and hematopoietic cell transplantation. With 200 board-style questions and answers with detailed rationales, Hematology Board Review is the go-to, quick review for any trainee

preparing for initial certification and for hematologists or oncologists preparing for recertification. Key Features: Includes 200 board-style questions and answers with rationales Provides key point summaries of each topic area for quick study and easy recall Thorough coverage of hematologic malignancies, blood disorders, transfusion medicine, hematopoietic cell transplantation, and standard treatment regimens Tables providing key data and information related to staging, treatment options, and disease classifications

The perioperative care of individuals with neurologic compromise is critically important, yet it is only one dimension of the rich relationship between anaesthesiology and the neurosciences. The mechanism of everyday therapeutic interventions such as anaesthesia and analgesia is exciting neuroscience in its own right. At the new frontier of outcomes studies lies the question of how the perioperative period might impact the brain. For example, questions related to anaesthetic neurotoxicity, delirium, and cognitive dysfunction pose critical challenges for the field. The Oxford Textbook in Neuroscience and Anaesthesiology addresses the exciting field of neuroanaesthesiology in a new and stimulating way. In twenty eight chapters, the neuroscientific basis of anaesthesiology, the full spectrum of clinical neuroanaesthesia, and the care of neurologic patients undergoing non-neurologic surgery are explored in one comprehensive textbook for the first time. The first section considers the neural mechanisms of general anaesthetics, cerebral physiology, the neurobiology of pain, and more. The second section explores the care of patients with neurologic disease in the operating room or intensive care unit. These clinical chapters systematically treat the perioperative considerations of both brain and spine surgery, and provide introductions to neurocritical care and pediatric neuroanaesthesia. The final section outlines the care of neurologic patients undergoing non-neurologic surgery. It examines key connections of neurology and anaesthesiology, examining how conditions such as dementia, stroke, or epilepsy interface with the perioperative period. Each chapter has been carefully crafted to be concise yet highly informative, reflecting the cutting edge of neuroscience and neuroanaesthesiology. This international textbook gathers the best available expertise of authors and leaders worldwide. Includes access to online-only content, including more than 20 cases and more than 90 questions that can be used in presentations and teaching sessions. By activating your unique access code, you can access and use the material.

This book covers the topics of occult primaries in an interactive, self-assessment format. Topics like epidemiology, molecular biology, diagnosis and management are covered in detail, along with miscellaneous topics pertinent to CUP. Complete set of books for NEET-SS oncology (medical oncology, surgical oncology and clinical hematology): Volume 1: <https://www.amazon.in/dp/B08371FV41> Volume 2: <https://www.amazon.in/dp/B083VXXZY8> Volume 3: <https://www.amazon.in/dp/B0846RY856> Volume 4: <https://www.amazon.in/dp/B0899DTDGQ> Radiation physics MCQs: <https://www.amazon.in/dp/B08YWLNG7V> Oncology is an ever evolving subject and it's important to stay updated. www.amazon.com/author/bhratribhushan

Academic geriatricians are always looking for an improved objective, quantifiable measure of biological ageing in humans to replace that unphysiological

and arbitrary scale 'years survived'. The MCQ may be the nearest we have come yet to achieving this Holy Grail. An individual's facility with the

setting and answering of MCQs separates the medical generations more surely than years. I am only grateful I was educated in a less rigorous but

perhaps more 'gentlemanly' era. If one appeared before an examiner neatly dressed with clean finger nails and the examination scripts were literate

essays written in fountain pen then you were in - or so it seemed. For the past 20 years we have been evolving towards much more objective and rigorous

assessment of knowledge and understanding of medicine of both undergraduate and postgraduate students. This process has been exemplified by the

evolution of what is now the seemingly ubiquitous MCQ. When initially presented as objective and quantifiable measures of clinical knowledge MCQs were

the subject of scorn - how could they assess the art of medicine - the grey areas of clinical decision making? However they very rapidly overcame this

antediluvian scepticism and I believe they have had an effect well beyond the limited area of competence measurement. They have induced or at the very

least contributed to a shift towards a more rigorous, dare one say more scientific, approach to clinical medicine.

Whether you're a newly diagnosed brain tumor patient, a survivor, or a friend or relative of either, this book offers help. Completely revised and

updated, 100 Questions & Answers About Brain Tumors, Second Edition gives you authoritative, practical answers to your questions about treatment

options, post-treatment quality of life, sources of support, and much more. The authors, a brain tumor survivor teamed with a neuro-oncologist

specializing in brain tumors, provide a comprehensive, step-by-step discussion of what you can expect in the diagnosis and treatment of brain tumors,

while providing a real-life understanding of what these steps might mean for your day-to-day life. This book is an invaluable resource for anyone coping

with the physical and emotional turmoil of this frightening disease.

This textbook provides a comprehensive overview of the state of the art knowledge of breast cancer management for the modern breast surgeon. It covers all aspects of multidisciplinary care including primary breast and axillary surgery, reconstruction and oncoplastic techniques, external beam radiotherapy and newer techniques such as tomotherapy, intraoperative radiotherapy and brachytherapy. In addition, systemic therapies including chemotherapy, the latest biological targeted therapies and endocrine therapies are covered. Readers can find out about other important aspects of breast cancer such as genetics, screening, imaging and long-term health among others. Chapters take the reader through the basics up to the highest levels of knowledge in an easy to understand format with management algorithms to aid clinical care, generous referencing of the best literature and figures and photographs to illustrate each section. Published with the official approval of the European Society of Surgical Oncology (ESSO) and the European Society of Breast Cancer Specialists (EUSOMA), the book is written by a panel of recognised leaders in the field and is an indispensable guide for the practicing breast specialist and senior specialists in training, wishing to update their knowledge with the latest trends or polish off their training before accreditation.

I have written this book in four volumes. The other three volumes of "Oncology MCQs for NEET-SS" are available at: Volume 1: <https://www.amazon.in/dp/B08371FV41> Volume 2: <https://www.amazon.in/dp/B083VXXZY8> Volume 3: <https://www.amazon.in/dp/B0846RY856> When I was preparing for DM entrance, I experienced a dearth of books on the subject of hematology entrance and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of a hemat-oncologist and by relying on the highest quality material. The standard textbooks, NCCN guidelines and high impact journals were referenced for every question. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about hematology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of hematology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all of the updated information, all at once. I will be updating this book periodically for this purpose. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published over two dozen books on the subject of oncology and his papers have been published in renowned journals of medical literature. Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Perfect for any clinician short on time who needs to practice for oncology board exams, The Bethesda Review of Clinical Oncology is from the same authors who brought you the trusted and bestselling Bethesda Handbook of Clinical Oncology. It ' s packed with hundreds of disease-specific questions that are formatted just like an actual board review exam—so you can prep as effectively as possible and achieve test success.

Practical Clinical Oncology, 2nd edition, provides a practical and comprehensive review of the current management of common types of cancer. Introductory chapters give background information on the main treatment modalities and other key issues such as acute oncology, palliative care and clinical research, with new chapters on pathology and advanced external beam radiotherapy. Subsequent chapters describe the diagnosis and treatment of malignancies, based on tumour site or type. Finally, multiple choice questions allow the reader to test their knowledge. This edition has been fully updated to reflect the most current developments in radiotherapy, tumour biology and drug therapy. With an emphasis on practical aspects of cancer care that will be relevant to day-to-day decision making, this book is an invaluable resource on contemporary clinical management of the cancer patient for all trainees and practitioners involved in clinical oncology, medical oncology and palliative care, as well as for specialist nurses and radiographers.

This book offers a collection of specimen multiple choice questions (MCQs) for the first FRCR examination in clinical radiology that is for the physics module. It includes questions arranged in nine sets of 40 MCQs following the examination format. Additionally, chapters cover explanation to some of the answers for better understanding of the topics. The book covers updated syllabus of Royal College of Radiology (RCR), UK on scientific basis of medical imaging, including topics in molecular imaging. Each chapter with a practice set comprises of questions arranged in the order of the syllabus of the examination, starting from the basis of medical imaging and radiation physics to the principles of specific modalities and safety issues. This book offers assistance to candidates preparing for the first FRCR examination, clinical radiology trainees, and radiology and nuclear medicine postgraduate students.

This updated edition presents the latest, most authoritative cancer management recommendations in the famous fast-access Washington Manual outline format. Reorganized into three major sections, this comprehensive text covers the principles of cytotoxic therapy, clinical research, and more.

This book covers the topics of soft tissue sarcomas in an interactive, self-assessment format. Topics like epidemiology, molecular biology, diagnosis and management are covered in detail, along with miscellaneous topics pertinent to soft tissue sarcomas. Complete set of books for NEET-SS oncology (medical oncology, surgical oncology and clinical hematology): Volume 1: <https://www.amazon.in/dp/B08371FV41> Volume 2: <https://www.amazon.in/dp/B083VXXZY8> Volume 3: <https://www.amazon.in/dp/B0846RY856> Volume 4: <https://www.amazon.in/dp/B0899DTDGQR>

Based upon the popular review course from Harvard Medical School, The Brigham Intensive Review of Internal Medicine is a comprehensive study guide for the American Board of Internal Medicine certification or maintenance of certification examination as well as for general practice review by physicians and residents. This authoritative, thorough resource provides in-depth coverage on all specialties of internal medicine, as well as palliative care, occupational medicine, psychiatry, and geriatric medicine. Editors Ajay K. Singh and Joseph Loscalzo recruited leading authorities from Harvard as well as former chief residents at Brigham and Women's Hospital to contribute to this book. Featuring over 600 board review questions, with numerous tables and figures, chapters offer detailed discussions with emphasis on essential learning points. Over 100 chapters are organized into 10 broad sections, with one additional section dedicated to board simulation. As the required content for the American Board of Internal Medicine continues to evolve, studying can prove challenging. The Brigham Intensive Review of Internal Medicine is the ideal study guide for anyone preparing for certification or recertification.

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. The Bethesda Handbook of Clinical Oncology is a comprehensive review of the management of numerous cancer types, emphasizing practical information that can be applied in everyday, fast-moving patient care situations. With contributions from experts and scholars at the National Cancer Institute, National Institutes of Health, Cleveland Clinic, and other renowned institutions, this latest edition has been thoroughly revised with new content and continues to provide practical guidance on how to evaluate, diagnose, and treat cancer patients.

Preparing to Pass the FRCA: Strategies for Exam Success equips you with the skills of effective revision and time management to maximise your success. The book takes each element of the FRCA exam and provides tips and techniques on how to approach the different types of questions, and includes worked examples with answers, so that you can undertake your revision accordingly. It will help you to target your revision so you can cover the breadth of topics in the FRCA syllabus and ensure that you structure your revision in an efficient way, as well as helping you to approach the exam and convey your knowledge through writing or speech correctly. Taking many common problems candidates face when preparing for this exam, the book covers motivation, effective studying, managing nerves, and scheduling time to study amongst other commitments.

When I was preparing for DM entrance, I experienced a dearth of books on the subject of oncology and the books that were available were either not updated or were lacking in depth, that was when I conceived the idea of writing such a book myself. I have written this book purely from the perspective of an oncologist and by relying on the highest quality material, most importantly the Bible of oncology: DeVita, Hellman, and Rosenberg's Cancer Principles & Practice of Oncology 11th edition. The NCCN guidelines and high impact journals were also referenced as and when needed. The result is this book, which will serve the purpose of equipping the exam going (NEET-SS and board review, along with any other entrance exam where questions about oncology are asked) doctors with the right tool to test and build their knowledge. As the knowledge in the field of oncology is unfolding at an unprecedented scale and new strategies are being devised at a prolific pace, it is not possible to provide all the updated information, all at once. I will be updating this book periodically for this purpose and I would implore readers to keep themselves updated by going through the quarterly updates of DeVita's oncology that are included with the purchase of the 11th edition and also the NCCN guidelines. In case of any queries and suggestions regarding this book, kindly send to: bhratri@gmail.com Dr. Bhratri Bhushan MBBS, MD (Internal medicine), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature.

Companion volume to: Mayo Clinic internal medicine board review. 10th ed. c2013.

Written to help haematology and general medical trainees evaluate their own knowledge, and particularly useful for those preparing for the Part 1 examination of the Royal College of Pathologists. This exam-centered book will also be of use to core medical trainees preparing for the examinations of the Royal College of Physicians and the Royal Australasian College of Physicians and to haematology and general medicine trainees in other countries where methods of examination are similar. The 150 questions are presented in two formats, Single Best Answer and Extended Matching Question, and comes complete with detailed feedback and, when appropriate, relevant references are given for each question so that those who select the wrong answer will understand why another answer is better. Quick reference question book, ideal for examination preparation Includes 50 SBA questions, ideal for the Part 1 and Part 2 MRCP examinations, which although having a general medical slant, are also appropriate for haematology specialist trainees Includes 70 SBA multiple choice questions appropriate for haematology specialist trainees but also useful to core medical trainees Includes 30 EMQs suitable for those taking Part 1 of the FRCPath examination Questions come complete with fully referenced answers and discussion points This book provides an educational tool for training as well as an ideal way to prepare for examinations and is also of value to those who examine in haematology and haematopathology.

A unique point-of-care guide to clinical hematology-oncology that answers the most frequently asked questions Hematology-Oncology Clinical Questions is the single-best resource for quickly converting the most current data and research into practical, diagnostic real-time solutions. This unique book answers more than 60 of the clinical hematology-oncology questions most commonly asked of the authors during consultation. The content flow simulates the consultation process: Question...Data...Synthesis...Solution. The initial chapters prepare you with essential background fundamentals of hematology-oncology. Subsequent chapters are divided into tumor type, beginning with solid tumor types, and then hematological malignancies. Each chapter includes: •Key Concepts•The Clinical Scenario•The Action Items•Pearls Hematology-Oncology Clinical Questions will prove to be a powerful tool to help learners from all points of the clinical spectrum understand the basic concepts of caring for a cancer patient.

Head and Neck Surgery and Oncology, by Drs. Jatin P. Shah Snehal G. Patel, and Bhuvanesh Singh, offers you authoritative, multidisciplinary guidance on the latest diagnostic and multidisciplinary therapeutic approaches for head and neck cancer. With this medical reference book, you'll have all the help you need to offer your patients the best possible program to optimally preserve and restore form and function. Overcome any challenge in head and neck surgery with comprehensive coverage of the scalp, skull base, paranasal sinuses, oral cavity, pharynx, larynx, cervical lymph nodes, thyroid, salivary glands, and soft tissue and bone tumors - from incidence, diagnosis, and work up through treatment planning, operative techniques, rehabilitation, and outcomes. Increase your understanding of head and neck oncology with this completely reorganized edition, presenting a uniform flow of topics, which includes the latest information on Diagnostic approaches, staging, algorithms for selection of therapy, and outcomes of treatment for head and neck tumors. Offer today's best treatment options with the latest therapy data from the NCDB, institutional data from MSKCC, and evidence-based information Diagnose patients using the latest advances in radiographic imaging, diagnostic pathology, and molecular biology. Take fullest advantage of every multidisciplinary management approach available including radiation oncology, medical oncology (including targeted therapies), maxillofacial prosthodontics and dental oncology, surgical procedures for salvage of recurrences after chemoradiation therapy, and rehabilitation measures to improve functional outcomes (speech therapy, swallowing, etc.). Understand the nuances of day-to-day practical care of patients with basic operating room techniques and technology, intraoperative decisions, and post operative care of patients undergoing head and neck surgery. Know what to look for and how to proceed with sequential operative photographs of each surgical procedure and full-color artwork to illustrate anatomical relationships. Particular emphasis is placed on surgical management of patients after chemo-radiotherapy, reflecting the changing paradigms in head and neck oncology and the special challenges that confront modern day head and neck surgeons. This comprehensive text will assist in improved survival and preserving and restoring form and function with the best possible treatment of tumors.

This book covers the topics of gestational trophoblastic diseases in an interactive, self-assessment format. Topics like GTD and GTN epidemiology, molecular biology, diagnosis and management are covered in detail, along with miscellaneous topics pertinent to GTD and GTN. Complete set of books for NEET-SS oncology (medical oncology, surgical oncology and clinical hematology): Volume 1: <https://www.amazon.in/dp/B08371FV41> Volume 2: <https://www.amazon.in/dp/B083VXXZY8> Volume 3: <https://www.amazon.in/dp/B0846RY856> Volume 4: <https://www.amazon.in/dp/B0899DTDGQ> Radiation physics MCQs: <https://www.amazon.in/dp/B08YWLNG7V> Oncology is an ever evolving subject and it's important to stay updated. I have written these books, that I have written to supplement the four volumes of "Oncology MCQs for NEET-SS". The idea behind writing these books is to cover the subject in more depth. I will be adding new books to the list, please keep visiting this product description. <https://www.amazon.in/dp/B08CKFWLDJ> (Kidney cancers) <https://www.amazon.in/dp/B08CBBZZ9Q> (Bladder cancers) <https://www.amazon.in/dp/B08BYK39VV> (Bone sarcomas) <https://www.amazon.in/dp/B08BKDQMBH> (Thyroid cancers) <https://www.amazon.in/dp/B08CZ7WX67> (Prostate cancer) <https://www.amazon.in/dp/B08D9MDNNP> (Head & neck cancers) <https://www.amazon.in/dp/B08DMNJJW8> (Esophagus cancers) <https://www.amazon.in/dp/B08F2LXZH6> (Melanoma) <https://www.amazon.in/dp/B08FG6KH2P> (Soft tissue sarcoma) <https://www.amazon.in/dp/B08FXT5YJT> (NSCLC) <https://www.amazon.in/dp/B08GCTBBTG> (SCLC) <https://www.amazon.in/dp/B08GCTSFL9> (Colon cancer) <https://www.amazon.in/dp/B08GLGS3Z5> (Rectal cancer) <https://www.amazon.in/dp/B08J8DSV65> (Cancer pain)

management)<https://www.amazon.in/dp/B08KDDXGRT> (Pancreatic cancer)<https://www.amazon.in/dp/B08L6CPBSS> (Non-melanoma skin cancer)<https://www.amazon.in/dp/B08HL1> (Neuro-oncology)<https://www.amazon.in/dp/B08JM5CSMX> (Occult primary)<https://www.amazon.in/dp/B08KVVYVLQ> (Gastric cancer)<https://www.amazon.in/dp/B08GZ8FKDC> (Liver cancer)NEET-SS gynecologic oncology (MCh) books:<https://www.amazon.in/dp/B08B5SKJ9T><https://www.amazon.in/dp/B089R8GJKJ><https://www.amazon.in/dp/B089WBGW4M><https://www.amazon.in/dp/B085269K33><https://www.amazon.in/dp/B089LZGGGN>Please visit the Facebook Page for updates: <https://www.facebook.com/neetssoncology>Notes on how to read a kindle edition book" on your phone/tablet:1. Download the "kindle app" on your phone/tablet.2. Sign in with your Amazon account once you have installed the app (if you don't have an account, make one). Now your app is ready to use.3. Now comes the most important step. Remember that you can't buy a "kindle edition book" directly from this app you have just installed. So you should open your web browser (google/safari/firefox) and go to "www.amazon.in".4. Again sign in with your amazon account there.5. Once you have signed in your account on the browser, search Amazon for "Bhratri Bhushan" or "oncology MCQ books" or copy and paste the links provided above; you will see the books there.6. Purchase the book you want to read.7. After purchase, this book will automatically appear in your app.8. Open your app and read the book.(I have written this description because I had a difficult time figuring it out myself. I hope you will find it helpful. The most crucial step is the third one, so read it again. And I would like to repeat that you don't need a kindle device to read a kindle edition.)Dr. Bhratri Bhushan MBBS, MD (Medical oncology), DM (Medical oncology) is a consultant medical oncologist and hematologist. He has published a number of books on the subject of oncology and his papers have been published in renowned journals of medical literature. His works can be found at his AuthorCentral page: www.amazon.com/author/bhratribhushan This publication is aimed at students and teachers involved in teaching programmes in field of medical radiation physics, and it covers the basic medical physics knowledge required in the form of a syllabus for modern radiation oncology. The information will be useful to those preparing for professional certification exams in radiation oncology, medical physics, dosimetry and radiotherapy technology.
